**PRODUCT
CATALOGUE**

2021

Techtron is an ISO9001:2015 and BRC accredited chemical manufacturing facility that specialises in the production of automotive care products.

We have over 30 years' experience of new product development, blending and filling. We have onsite laboratories and team of chemists who work tirelessly to produce market leading formulations which we then release to our customers.

Techtron offer a complete turnkey solution for our customers offering services of product formulation, regulatory and compliance, blending, quality control, filling, dispatch, logistics and distribution.

We have six production lines offering flexibility on the pack sizes and volumes that can be produced. Our fill range spans from 50ml to 1000L with production runs from 500 bottles to 1.5 million units which enables us to work with small start-up businesses to well-established brands.

We are conveniently located on the Deeside Industrial Park on the border on North Wales with fantastic transport links to the North and the South. We offer our customers the option of collecting product direct from the site using their own haulier or our dispatch team is happy to help with arranging transport requirements.

We offer a private labelling service that allows customers to purchase products and release them under their own brand as an alternative to committing to developing a new product from scratch which carries higher minimum order quantities and longer timescales.

Whether you are an established brand looking to add to your range or you are looking to try out a new market we have a solution for you. We have a team of formulation chemists and laboratory technicians with a depth of experience who specialise in developing auto care products. In a bid to constantly remain at the forefront of technology, they liaise closely with suppliers, watch market trends across multiple sectors and where possible use new and innovative raw materials to give our customers numerous substantiated on-pack claims to for their products.

All products featured in this brochure have been individually trialled for their performance and have completed both product stability and packaging compatibility. These products have all been developed with performance in mind to give our customers the opportunity to compete with the market leaders.

Our regulatory team work hard to ensure that we remain up to date with current regulations and amendments and can advise on product labelling and provide safety data sheets for the products. We provide visibility on all ingredients used within the products.

We offer all you need to start or grow your brand. Techtron has worked for many years with customers in the Automotive and Maintenance sectors, solving day-to-day cleaning problems through to the heavy-duty issues they face.

We have formulated, blended, and packed tried and tested automotive products for over 13 years, and we are now extending our scope to allow customers to benefit from this knowledge by making available a select range of product for private label.

Our products have been developed by professional formulation chemists and are manufactured under strict quality control measures to ensure the best performance and value for money for our customers. Private label allows customers access to intellectual property and product distribution without the time and cost required for product formulation and development.

Leather and fabric cleaner works on surfaces to dissolve dirt and grease. Penetrating deep within the fabric and upholstery, this powerful cleaning solution removes stubborn stains. Suitable for the use on carpets, fabrics, and upholstered surfaces.

KEY FEATURES

- > Unfragranced
- > Quickly and easily removes stubborn stains from all interior fabrics and surfaces
- > Suitable for interior fabrics and hard surfaces
- > Easy to use simple spray on wipe off formula

APPLICATION AREA

- > Leather
- > Fabric
- > Upholstery

FRAGRANCE

- > Fragrance-Free

PACK SIZE

- > 250ML

FABRIC PROOFER

For more info, get in touch: [✉ info@techtron.co.uk](mailto:info@techtron.co.uk) [☎ 01244 424 380](tel:01244424380)

FABRIC PROOFER

Easy to use, water based, solvent free water proofer for fabric, leather, and upholstery. Fabric proofer imparts a hydrophobic water-resistant surface to provide protection from staining and soiling redeposition. Easy to use, professional finish in minutes.

KEY FEATURES

- > Easy to use
- > Water based
- > Maintains breathability of fabric
- > Solvent free
- > Long-lasting protection

APPLICATION AREA

- > Car seats

FRAGRANCE

- > Fragrance-Free

PACK SIZE

- > 250ML

UPHOLSTERY CLEANER

For more info, get in touch: [✉ info@techtron.co.uk](mailto:info@techtron.co.uk) [☎ 01244 424 380](tel:01244424380)

UPHOLSTERY CLEANER

A concentrated upholstery and fabric cleaner suitable for use on vehicle interiors including carpets, fabrics, vinyls, rubber, and plastic. Designed to remove built up dirt and grime, and remove stubborn stains leaving a clean, fresh fragrance.

KEY FEATURES

- > 3 in 1 formula
- > Cleans
- > Freshens
- > Protects from re-soiling
- > Long-lasting new car fragrance
- > Suitable for use on high traffic areas
- > Removes difficult stains

APPLICATION AREA

- > Interior – upholstery

FRAGRANCE

- > Fragrance-Free

PACK SIZE

- > 250ML

LEATHER PROTECTION GEL

For more info, get in touch:

✉ info@techtron.co.uk

☎ 01244 424 380

LEATHER PROTECTION GEL

Leather protection gel has been formulated to feed and condition leather surfaces to restore a soft supple feel. Leather protection gel helps to protect against the harsh UV rays through car windows that can cause cracking, fading, and discolouration. A gel format allows for easy application and quick drying, leaving a natural sheen.

KEY FEATURES

- > Quick drying formula
- > Gel format
- > Natural sheen
- > Conditions
- > Restores
- > Prevents cracking
- > Feeds, nourishes, and protects

APPLICATION AREA

- > Car interior and seats

FRAGRANCE

- > 5L
- > 20L

DEVELOPMENT

IF YOU ARE LOOKING FOR A BESPOKE OFFERING, WE OFFER PRODUCT DEVELOPMENT SERVICES.

Our team of formulation chemists and laboratory technicians are available to assist you with developing your new product brief. We develop products from an idea/concept, or benchmark against a competitor product that is already on the global market.

- Free product development.
- Wide variety of packaging.
- MOQ (minimum order quantity) is 2000 units per SKU.
- Exclusivity is available, so that your product has a signature fragrance.

We formulate to include or avoid specified ingredients, and to meet product accreditations where required. Our selection of materials is based on knowledge, experience, and customer specification. Products can be developed to meet specific on pack

accreditations or specific marketing claims (e.g., natural, allergen free, hypoallergenic, and sustainable).

All our products are designed to meet the current legislation for this sector and will be supplied with product stability and packaging compatibility reports. Our products are accompanied with a safety data sheet and comprehensive labelling guidance. The labelling information includes product claims that can be made, instructions for use, ingredients declarations, health, and safety information.

Product samples are delivered to your door at no cost, and you will be assigned your own Account Manager to guide you through the process.

We are a team of highly experienced professional covering product formulation, regulatory/compliance, sales, and marketing. At Techtron we have been working in this sector for 13 years and as a team we bring comprehensive knowledge of the market and the products and best of all we develop the products free of charge!

ARTWORK

FOLLOWING SELECTION OF YOUR PRODUCTS THE NEXT STEP IN OUR PROCESS IS ARTWORK GENERATION.

We will provide you with a label content guidance sheet, which provides regulatory information that your product must include on its outer pack and in addition to some product claims and marketing information that you may use at your discretion. You might decide to add in additional marketing information to your label to support your brand story if you chose. Our label templates can be sent to your graphic designer along with the label dimensions that we provide. **Please do not amend dimensions for product labels as these are designed specifically for the available label panel on your selected packaging.** Label dimensions may vary, so please check this for each product.

Once your artwork has been completed by your designer please email this back to your Account Manager, who will then send it to our regulatory and compliance department to review. Whilst they cannot provide guidance on all aspects of your label, they provide advice on the specific regulatory item. We may ask you to add or remove text or statements and make alterations to symbol sizes and their prominence.

SPECIFICATIONS

APPROVAL OF PACKAGING SPECIFICATION

Following the approval of your artwork we will build a bill of materials (BOM) for your product and will purchase all corresponding ingredients and packaging components in line with this. Our Technical department will form the BOM and produce a packaging specification that details your specific requests as discussed with your Account Manager. This document is used by our production operatives to produce your products, ensuring that all instructions are followed.

It is crucial that you check the accuracy of the information included on the packaging specification. Your Account Manager will send this to you for your approval. All amendments to this document will be tracked through our system for subsequent production runs.

ORDER

HOW TO SEND US YOUR ORDER.

Once you have finalised your product selection and you have decided that you would like to proceed, the below process must be followed.

- 1.** Firstly, you will need to send us your order via email. This email will act as written confirmation to us that you would like to proceed with purchase and should include the product description, the quantity you require and the price. Please email your order: **sales@techtron.co.uk** and copy in your Account Manager.
- 2.** Confirmation of your order will be processed by our Sales Administrators.
- 3.** You will then receive an order acknowledgement. On this acknowledgement you will be provided with an indicative timeframe for your products manufacture. Please do not leave your ordering until the last minute, the more notice that you give us the better.

The global pandemic has meant that lead times can vary, and changes to timeframes should be expected. Manufacturers and supply chains are having to work differently with additional social distancing measures in place which means that we cannot operate as efficiently as we used to.

Our suppliers of the ingredients and packaging components are also working hard to provide stability during this turbulent time however, we are noticing that due to national lockdown restrictions and covid-19 outbreaks on their sites that delays are anticipated.

ACKNOWLEDGEMENT

PRODUCTION UPDATES

At the point of order, you will receive an order acknowledgement which will provide an estimated week of production. As this week approaches, we will provide you with a further update to confirm your production day/s. Should there be an alteration to timescales,

including pull forwards or delays, we update you at our earliest opportunity. During this time, you might be contacted by your Account Manager or our Sales/Dispatch team.

DELIVERY

DISPATCHING YOUR PRODUCTS

When your production date is approaching our Sales/Dispatch Administrator's will contact you for specific details on your deliveries. All quotations exclude delivery, so this will be an additional charge. Our administrator will ask for some specific information regarding delivery addresses and your booking in procedures.

If you are planning to send your items direct to a fulfilment centre such as Amazon, please inform us at your earliest convenience and we can work with you to ensure that our specifications are aligned.

All products will arrive palletised, and we assume that you can unload pallets from flatbed vehicles at height. If you are unable to unload pallets, please inform us of this in advance and we can make arrangements with our hauliers to ensure your goods can be unloaded at your delivery address. For full loads we will use our approved suppliers, and for single pallets we use Pallex.

Should you wish to arrange your own transport, you are permitted to collect products from our premises using your preferred hauliers. All collections must be booked in advance with our Goods Inwards team on **01244 281 628**, option 3.
